

Helpdesk

Registration  
website

Warehouse

Customer  
DB

```
graph TD; Helpdesk[Helpdesk] --> CustomerDB[(Customer DB)]; Registration[Registration website] --> CustomerDB; Warehouse[Warehouse] --> CustomerDB;
```

The diagram illustrates a data architecture where three external systems—Helpdesk, Registration website, and Warehouse—interact with a central Customer DB. Each system is represented by a rectangular box at the top, and the Customer DB is represented by a cylinder at the bottom. Arrows from each box point towards the cylinder, indicating data flow or interaction.
